

# POWER PEOPLE

## Talent Acquisition for a Greener Future

### Offshore Wind

The global wind market is set for exponential growth over the next few years. The industry is changing, and we understand the challenges facing the sector.

Power People has proven experience in supporting TSOs, developers and contractors for numerous offshore wind jobs and projects throughout the world.

We place permanent personnel across a wide range of wind energy disciplines. These include engineering, QHSE, project controls and SCM, geotechnical and project management.

Our dedicated team of consultants can support clients throughout the whole project lifecycle.

This includes the areas of cable engineering, offshore installation, fabrication and inspection, commissioning, and O&M.
